Table II - Federal Contributions - Canada Assistance Plan

Government

Subject

Objet

Gouvernement

Please note the changes made to the attached tables from the July 1994 "Green Book Tables." Changes were made to Table II - Federal Contributions - Canada Assistance Plan pages 16, 25, 27 and 28, which in turn affected pages 3, 12, 14 and 15 of Table II - "Federal Contributions as a Percentage of Provincial Government Health Expenditures."

We have highlighted in italics the items that have changed. Please adjust your copy of the "Green Book Tables" accordingly.

Paul Kasimatis

PROVINCIAL GOVERNMENT HEALTH EXPENDITURES and RELATED FEDERAL CONTRIBUTIONS

This series of tables covers provincial government health expenditures, federal contributions to the provinces under Established Programs Financing (EPF) and the Canada Assistance Plan (CAP), as well as federal contributions as a percentage share of provincial government health expenditures.

The data are displayed in two sets of tables - one for provincial expenditures and one for federal contributions. The years are fiscal, ending March 31, and the figures are in thousands of Canadian dollars. Table headings are hospital services, physician services, extended health services (home care and other institutions), and other health services. These headings have been changed as was proposed in the July 1993 report. Definitions of disaggregated categories and associated methodologies correspond to those in the publication "National Health Expenditures in Canada." However, the distribution of items that make up the table headings described above, are slightly different than those appearing in other Health Canada publications, most notably in the categories of Extended Health Services and Other Health Services. The components that make up each heading in this publication are detailed below.

Hospital Services - This category includes public, proprietary and federal hospitals for acute, extended, and rehabilitation care. Specific types of hospitals included here are: general hospitals, psychiatric hospitals, convalescent hospitals, chronic care hospitals, as well as specialty hospitals such as pediatric, neurology, orthopedic, cardiology, maternity, cancer hospitals etc.

Physician Services - This category represents expenditures on professional health services provided by physicians. The largest component is professional fees, primarily those paid by provincial medical care insurance plans for services provided by physicians. The remuneration of physicians who are on payrolls of hospitals, public health agencies, and the like are not included here but are counted within the heading concerned.

Extended Health Services - This category comprises homes for the aged; institutions for the physically handicapped, the mentally retarded, the mentally handicapped (a group that includes, according to the Statistics Canada reporting document, "expsychiatric patients, individuals with chronic mental illness and/or those convalescing from a mental illness"), emotionally disturbed children, alcoholics, and drug addicts; and nursing homes. Non-health expenditures in these facilities are excluded where practicable. Facilities solely of a custodial or domiciliary nature are also excluded, as are those for transients and for delinquents. This category also includes Home Care.

Other Health Services - This category is the aggregation of several categories of expenditures including: health professionals other than physicians, drugs, medical transportation, eyeglasses, hearing aids, other appliances and prothesis,

prepayment administration, public health, capital expenditures, health research and miscellaneous health costs.

Provincial expenditures represent all expenditures made by the individual provinces for health purposes, including the re-spending of federal contributions. Data are retrieved from the public accounts and special reports from the individual provinces.

Federal contributions include:

Established Programs Financing (EPF) - represent cash and abated income-tax points provided to the provinces for health care from 1977-78 onward. Prior to 1977-78 cash contributions were made to the provinces under the Hospital Insurance and Diagnostic Services Act and the Medical Care Act. Under EPF amounts for hospital services and medical care are distributed using a formula provided by the federal Department of Finance, while those for extended health services are as designated under the legislation.

In some provinces where extra-billing by physicians and user-charges by hospitals were allowed, federal contributions were reduced by the estimated amount of the extra-billing and the user-charges. When these practices were outlawed, the provinces were reimbursed for any losses. These tables take into account both the reductions and the reimbursements.

Canada Assistance Plan (CAP) - under this plan the federal government funds health programs not covered by Established Programs Financing. The distribution of these expenditures is estimated by the analysts in the Cost Shared Programs Directorate of Human Resources Development. Revisions have been made to the extended health services to eliminate spending on Homes for Special Care requiring no nursing, Transition Homes, Boarding Homes and Hostels. This will bring the CAP data definition closer to that of National Health Expenditures.

Federal contributions as a percentage of provincial government health expenditures - are the total of the expenditures under EPF plus CAP as a proportion of provincial health expenditures including the re-spending of the contributions.

The reader should be aware that revisions are under way on provincial government health expenditures for the province of Quebec, especially with respect to the boundaries between health and social spending. Revisions that have been identified thus far are expected to lead to a decrease of total health expenditures in Quebec by approximately 5% to 6% per year for the period 1987 to 1991.
